

I-8411

I-8411

FEATURES

The I-8411/I-8811 are serial embedded controller with 4/8 I/O slots. Both are equipped with MiniOS7, an embedded OS similar to DOS that is developed by ICPDAS Co., LTD.

A photograph of the ICPDAS I-8411 serial embedded controller. The device is a small, rectangular circuit board with a light blue plastic housing. On the front panel, there is a small LCD display showing the number '88888'. Above the display are four yellow push buttons. To the left of the display are two ports: a serial port (DB9) and a parallel port (DB25). The top of the board is labeled 'ICPDAS I-8411'. The back of the board shows various electronic components, including integrated circuits, capacitors, and connectors for expansion slots.
