

XP-8141-Atom

# XP-8141-Atom

## FEATURES

The image shows the rear panel of the XPAC XP-8141-Atom. It features a black plastic cover with various ports and indicators. On the left side, there are two RS-232C COM2 ports and one RS-232C port. In the center, there's a power button labeled PWR and three status LEDs labeled RUN, L1, and L2. Below these are two USB ports labeled P3 and P4. To the right of the USB ports is a LAN2 port with a Link/Act indicator. Further right, there's a CF card slot. On the far right, there's another LAN1 port with a Link/Act indicator and a 100M/1G speed indicator.
