FEATURES

REMAINDER SALE
The EPC-SER2L2 is a compact PC with Embedded Linux that offers many possibilities of use.
Examples of use could be:
- FTP server with 2 network connections, which can utilize local network speeds for uploading files.
- Firewall, proxy server and NAT using the software iptables.
- Built-in GoAhead web server. Files for the web server are placed on a micro SD card and mounted.
- Serial port server with ser2net.
