

I-7005-G 8-channel Thermistor Input and 6-channel Digital Output Module using the DCON Protocol (Gray Cover)

FEATURES

The I-7005 module is used for measuring temperatures using a thermistor. The module supports a wide range of thermistors, including support for user-defined thermistor types, which can be added by specifying the Steinhart coefficients, and features individual channel configuration, meaning that each of the eight input channels can be individually configured for different kinds of thermistor.
