

CNV12V350W+

Inverts from 12VDC to 230VAC (350W). Modified sine  
for car, bus, caravan

## FEATURES

- 12VDC for 230VAC inverter with step-by-step sine wave
- 12-volt battery for supplying 230VAC devices
- NOTE: at 350Watt, the current from the 12V battery is 32Amp !!
- Make short and powerful battery cables
- 5V USB Outlet
- Supply: 9.5-16VDC
- With Schukostik &nbsp;

## SPECIFICATIONS

|                 |   |                                                                      |
|-----------------|---|----------------------------------------------------------------------|
| Operating Temp. | : | -30~+70°C                                                            |
| Alarm           | : | 10.5±0.5v                                                            |
| Beskyttelse     | : | Overbelastning, kortslutning og overophedning (frakobler automatisk) |
| Input           | : | 9.5-16VDC                                                            |
| Spænding        | : | 350 W                                                                |
| Stik            | : | DC: Cigar plug + Clip Cable                                          |
| Udgange         | : | 230 VAC ± 8 %, 50 Hz 5VDC via USB stik                               |
| Virkningsgrad   | : | 85%                                                                  |
| Weight          | : | 0.76kg                                                               |
| Dimensioner     | : | 175x95x75mm                                                          |
