

1-wire temperature sensor, -40 - + 85 ° C, Dallas chip, IP65, 1 meter cable

FEATURES

- Temperature sensor with Dallas chip - up to 8 pieces on the same bus
- 1-wire communication to the measuring electronics
- ± 0.5 ° C accuracy from -10 ° C to + 85 ° C
- 12 bit resolution
- Aluminum head provides low thermal resistance
- IP65 close
- Very low power consumption
- Each unit has a unique 64 bit serial number
