

Temperature and humidity sensor with RS485, -20 to +65°C, 10-90%rH, MODBUS, cascade connection

FEATURES

- Combi sensor for temperature and humidity measurement
- Modbus RTU
- 2 x RJ45 connectors - with daisy chain to next module
- RS485 Bus to Controller.
- Up to 32 devices can be connected to the Controller
- 3.0% relative humidity measurement accuracy
- 12 bit resolution for moisture measurement
- 14 bit resolution for temperature measurement
- With mounting flanges
- Excellent long-term stability
- Each module has its own ID code
