

TSH300

Temperature and humidity sensor with RS485, -20 to +65°C, 10-90%rH, MODBUS, cascade connection FEATURES

Combi sensor for temperature and humidity measurement
Modbus RTU
2 x RJ45 connectors - with daisy chain to next module
RS485 Bus to Controller.
Up to 32 devices can be connected to the
Controller
3.0% relative humidity measurement accuracy
12 bit resolution for moisture measurement
14 bit resolution for temperature measurement
With mounting flanges

Excellent long-term stability
Each module has its own ID code
