Ethernet-based output module with 2 x analog output, 4 x digital out with PWM, 2 x relay contact, MODBUS

$454.43 tax excluded

Product attributes:

Reference: TCW280
UPC: 25946

Multi output module for networks with galvanic I/O

10/100 Mbit Ethernet connection

Password-protected WEB server

2 analog outputs with voltage and current generator

0 - 20mA, 4 - 20mA, 0 - 24mA

0 - 5V or 0 - 10V voltage output

12-bit resolution

4 digital (open Drain) outputs with ON/OFF or PWM

2 relays with COM, NO and NC contacts

4 scheduled actions, once or weekly

Supports NTP

SNMP v2, SNMP trap for up to 5 recipients

MODBUS TCP/IP

HTTP upload with current status in XML or JSON file to remote server

HTTP API commands in server and client mode

HTTP Post can be sent to 3 servers

DIN rail/wall mounting

10 - 28VDC/ max. 250mA - optional PSU
