Current Data Logger 4 - 20mA, 20mS sampling time, 16-bit resolution, channel 1, 8MB of memory, battery power, USB

FEATURES

The 16-bit A / D converter in data logger failed
With temperature compensation to 8 Megabyte memory to log data
USB and RS232, automatic baud rate up to 115.2kbit
Battery operation - 12 year battery
optional: Software for configuration export, plotting, analysis and reporting (not included)
Configurable alarm controls
measurement speed from 20 milliseconds (1 channel) to 12 hours
Robust aluminum housing
coated circuit boards to protect against moisture, corrosion
Dimensions: 88 x 65 x 24mm
Weight: 200 grams
