

M485-LEAK1-I

1 channel leak detector MODBUS RTU, RS485, alarm relay, Sensitivity adjustment. DIN -25 - +75°C 10 - 30VDC 1.5W

FEATURES

- 1 channel detection of fluid leakage with MODBUS
- Shutter local alarm of detection of water leakage
- Acoustic alarm - adjustable
- RS485 2-wire MODBUS RTU
- 2 x LED indicators for power and alarm
- Relay output for alarm for water leakage - 30VDC / 2A
- Monitor cable for liquid detector
- Sensor cable can be up to 500 meters
- Sensitivity is adjustable
- Supports DCON and Modbus RTU protocols
- Embedded Dual Watchdog
- Operating temperature: -25 to + 75 ° C
- Small form factor with DIN bracket
- Dimensions: 83 x 70 x 29 mm
- Operating voltage: 10 - 30VDC
