

Mini Load Cell Series for pressure and traction measurement. Stainless steel. From 22N to 2200N.
Waterproof model available

FEATURES

- Environmental sealing drawing and compression road cells
- proprietary interface Temperature compensated load meters
- Drag and print
- small size
- Construction of stainless steel
- variant for immersed in liquid
- mV/V 2.0
- For Strain Gauge with 350 Ohm
- Select the model with Newton Specification that fits the task
- Price depends on weight class and sealing
