

ETHIO16DI-2MQ

16 Channel digital input (Wet / Dry) Ethernet, 2 x LAN Daisy-Chain. Modbus TCP/IP, MQTT, -25 - +75°C FEATURES

- 16 x digital input over Ethernet / MQTT
- input voltage: Up to + 50VDC
- Built-in Web server
- Modbus TCP / UDP and MQTT protocols
- 2 Ports Ethernet switch (LAN Bypass) To Daisy-Chain
- Double watchdog (programmable)
- I/O-Pair connection (push and poll)
- support web configuration and firmware update via Ethernet
- 16 x input channels for Wet switch and DRY switch
- Wet is active at voltage in
- Dry is active at closing contact
- LED display To display I / O status
- Dim: 127 x 99 x 33 mm
- Supply voltage: 10 - 48VDC / 3W
