

C19 plug for cable with ground, 16A, 250V, C19 Coupler Stable power supply for demanding equipment IEC-60320

FEATURES

C19 Coupler – Stable power supply for demanding equipment

This grounded, 16A, polarized C19 coupler is designed for IT and industrial environments where reliable power connection to high-performance equipment is required.

Ideal for servers, high-power workstations, UPS systems, large network switches, blade enclosures and advanced medical equipment.

With its rectangular design and parallel pins, it ensures correct connection and safe operation – even with high current demands.

Perfect for both data centers and environments where stable power supply is critical.

Servers and powerful workstations

UPS and PDU units

Larger network and telecommunications equipment

High-current medical equipment

MAX 16A, 250Vac

Please note that the connector design may vary from the picture. Please contact us regarding any changes.
