

4 ch Temperature Datalogger, USB, for
Thermocouples K, J, T, S, R, -270°C to + 1760°C, up
to 960,000 loggings + SD card

FEATURES

- Temperature logger with 4 channels
- For Thermocouple sensors
- K: -270 - + 1370°C
- J: -210 - +1200°C
- Temperature: -270 - +400°C
- S: -50 - +1760°C
- R: -50 - +1760°C
- Internal memory for 960,000 loggings
- Expand memory with SD card
- LCD Display
- Log interval: 100mSec to 60min
- Accuracy, excluding sensor: +/-0.5°C - 1.5°C
- USB 2.0 interface
- Battery operation: 2 x AA batteries (60 days)
- USB 5VDC operation
- Dimensions: 120 x 75 x 32 mm
- Weight: 140g
- Operating temperature range: 0 - +50°C
