

## PROFINET to Modbus Master Converter with 4kV Isolation

### FEATURES

- PROFINET to Modbus Master Converter
- 4kV isolation between PROFINET and Modbus
- Vibration and shock resistant metal housing
- Operating temperature: -40°C to 105°C
- 1x RS485 up to 115200 bps for RS485
- 1x Ethernet ports 10/100 Base-T Autosensing
- DIN rail mountable
- Power input: 10-40VDC, 8-26VAC
- Configuration via software
- Dimensions: 76mm x 86mm x 40mm
- Weight: 250g

## SPECIFICATIONS

|                 |   |                             |
|-----------------|---|-----------------------------|
| Operating Temp. | : | -40°C/+105°C (-40°F/+221°F) |
| Baudrate        | : | Up to 115200 bps            |
| Data            | : | 10/100 Base-T Autosensing   |
| Porte           | : | 1xRS485, 1xEthernet         |
| Strømforsyning  | : | 10..40V DC; 8..26V AC       |
